## Case study 1: Asset investments monitoring for a 7 star luxury resort

### Background and Context

- The resort had made numerous investments into IT assets, kitchen assets, room assets over a number of years
- Finance and operations team had a different perspective hence timeliness and accuracy was a concern

### Solution

- Institutionalized codification of assets using barcodes
- Deployed a data capturing process using handheld devices
- Deployed Tareta's web-based Enterprise FAM solution

### Business Impact

- Operational efficiency in Fixed Asset Management lifecycle by 50%
- Accuracy of data has improved by 60%
- Saving by on time renewal of AMC and Insurance has jumped from zero to 100%
- Improved the accuracy of statutory reporting (98%)

## Case study 2: Streamlining asset audits for a manufacturer of temperature sensors

### Background and Context

The firm is a global leader in temperature sensors having its manufacturing and R&D centre in India. Company was seeking ways to:

- Adopt asset tracking process
- Automate the asset management process
- Traceability of assets
- Initiate audit process

### Solution

- Modified policy framework to cover all stages of asset lifecycle
- Institutionalized codification of assets using barcodes
- Deployed a data capturing process using handheld devices

### Business Impact

- Operational efficiency in asset management lifecycle by 40%
- Accuracy of data has improved by 70%(near real time updates)
- Easier fixed asset register analysis
